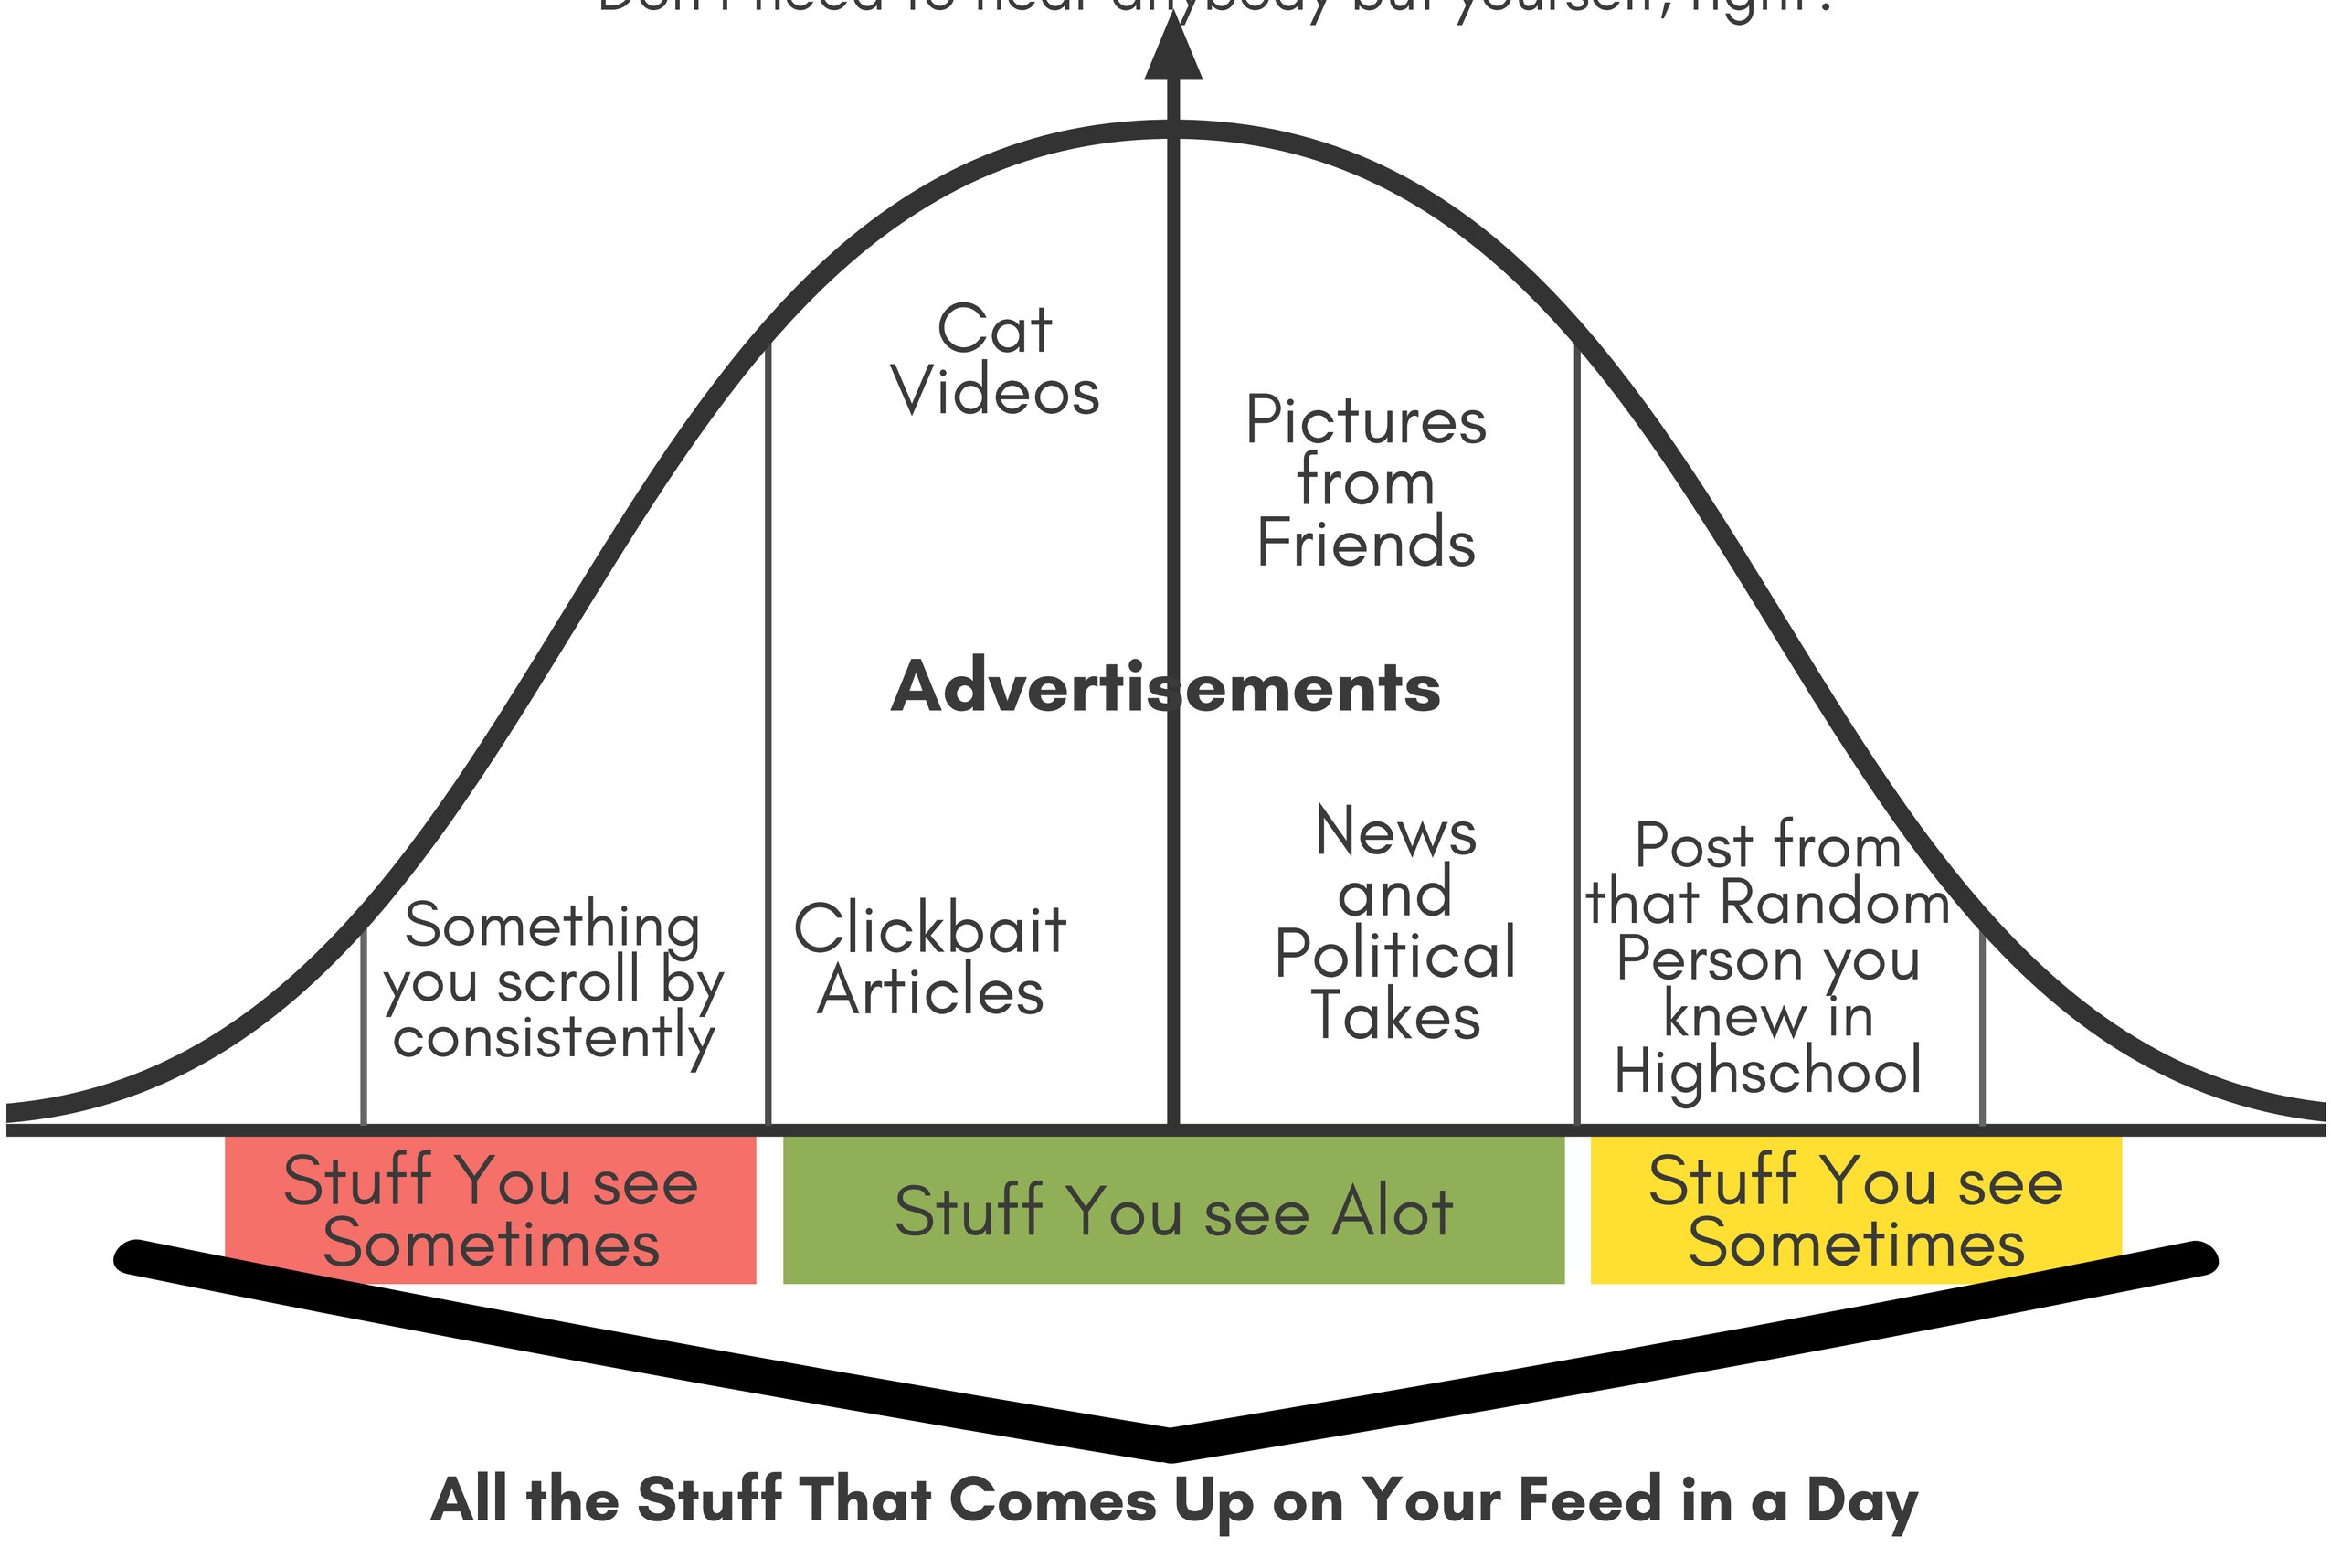
How to Create Your very Own Echo Chamber

Don't need to hear anybody but yourself, right?



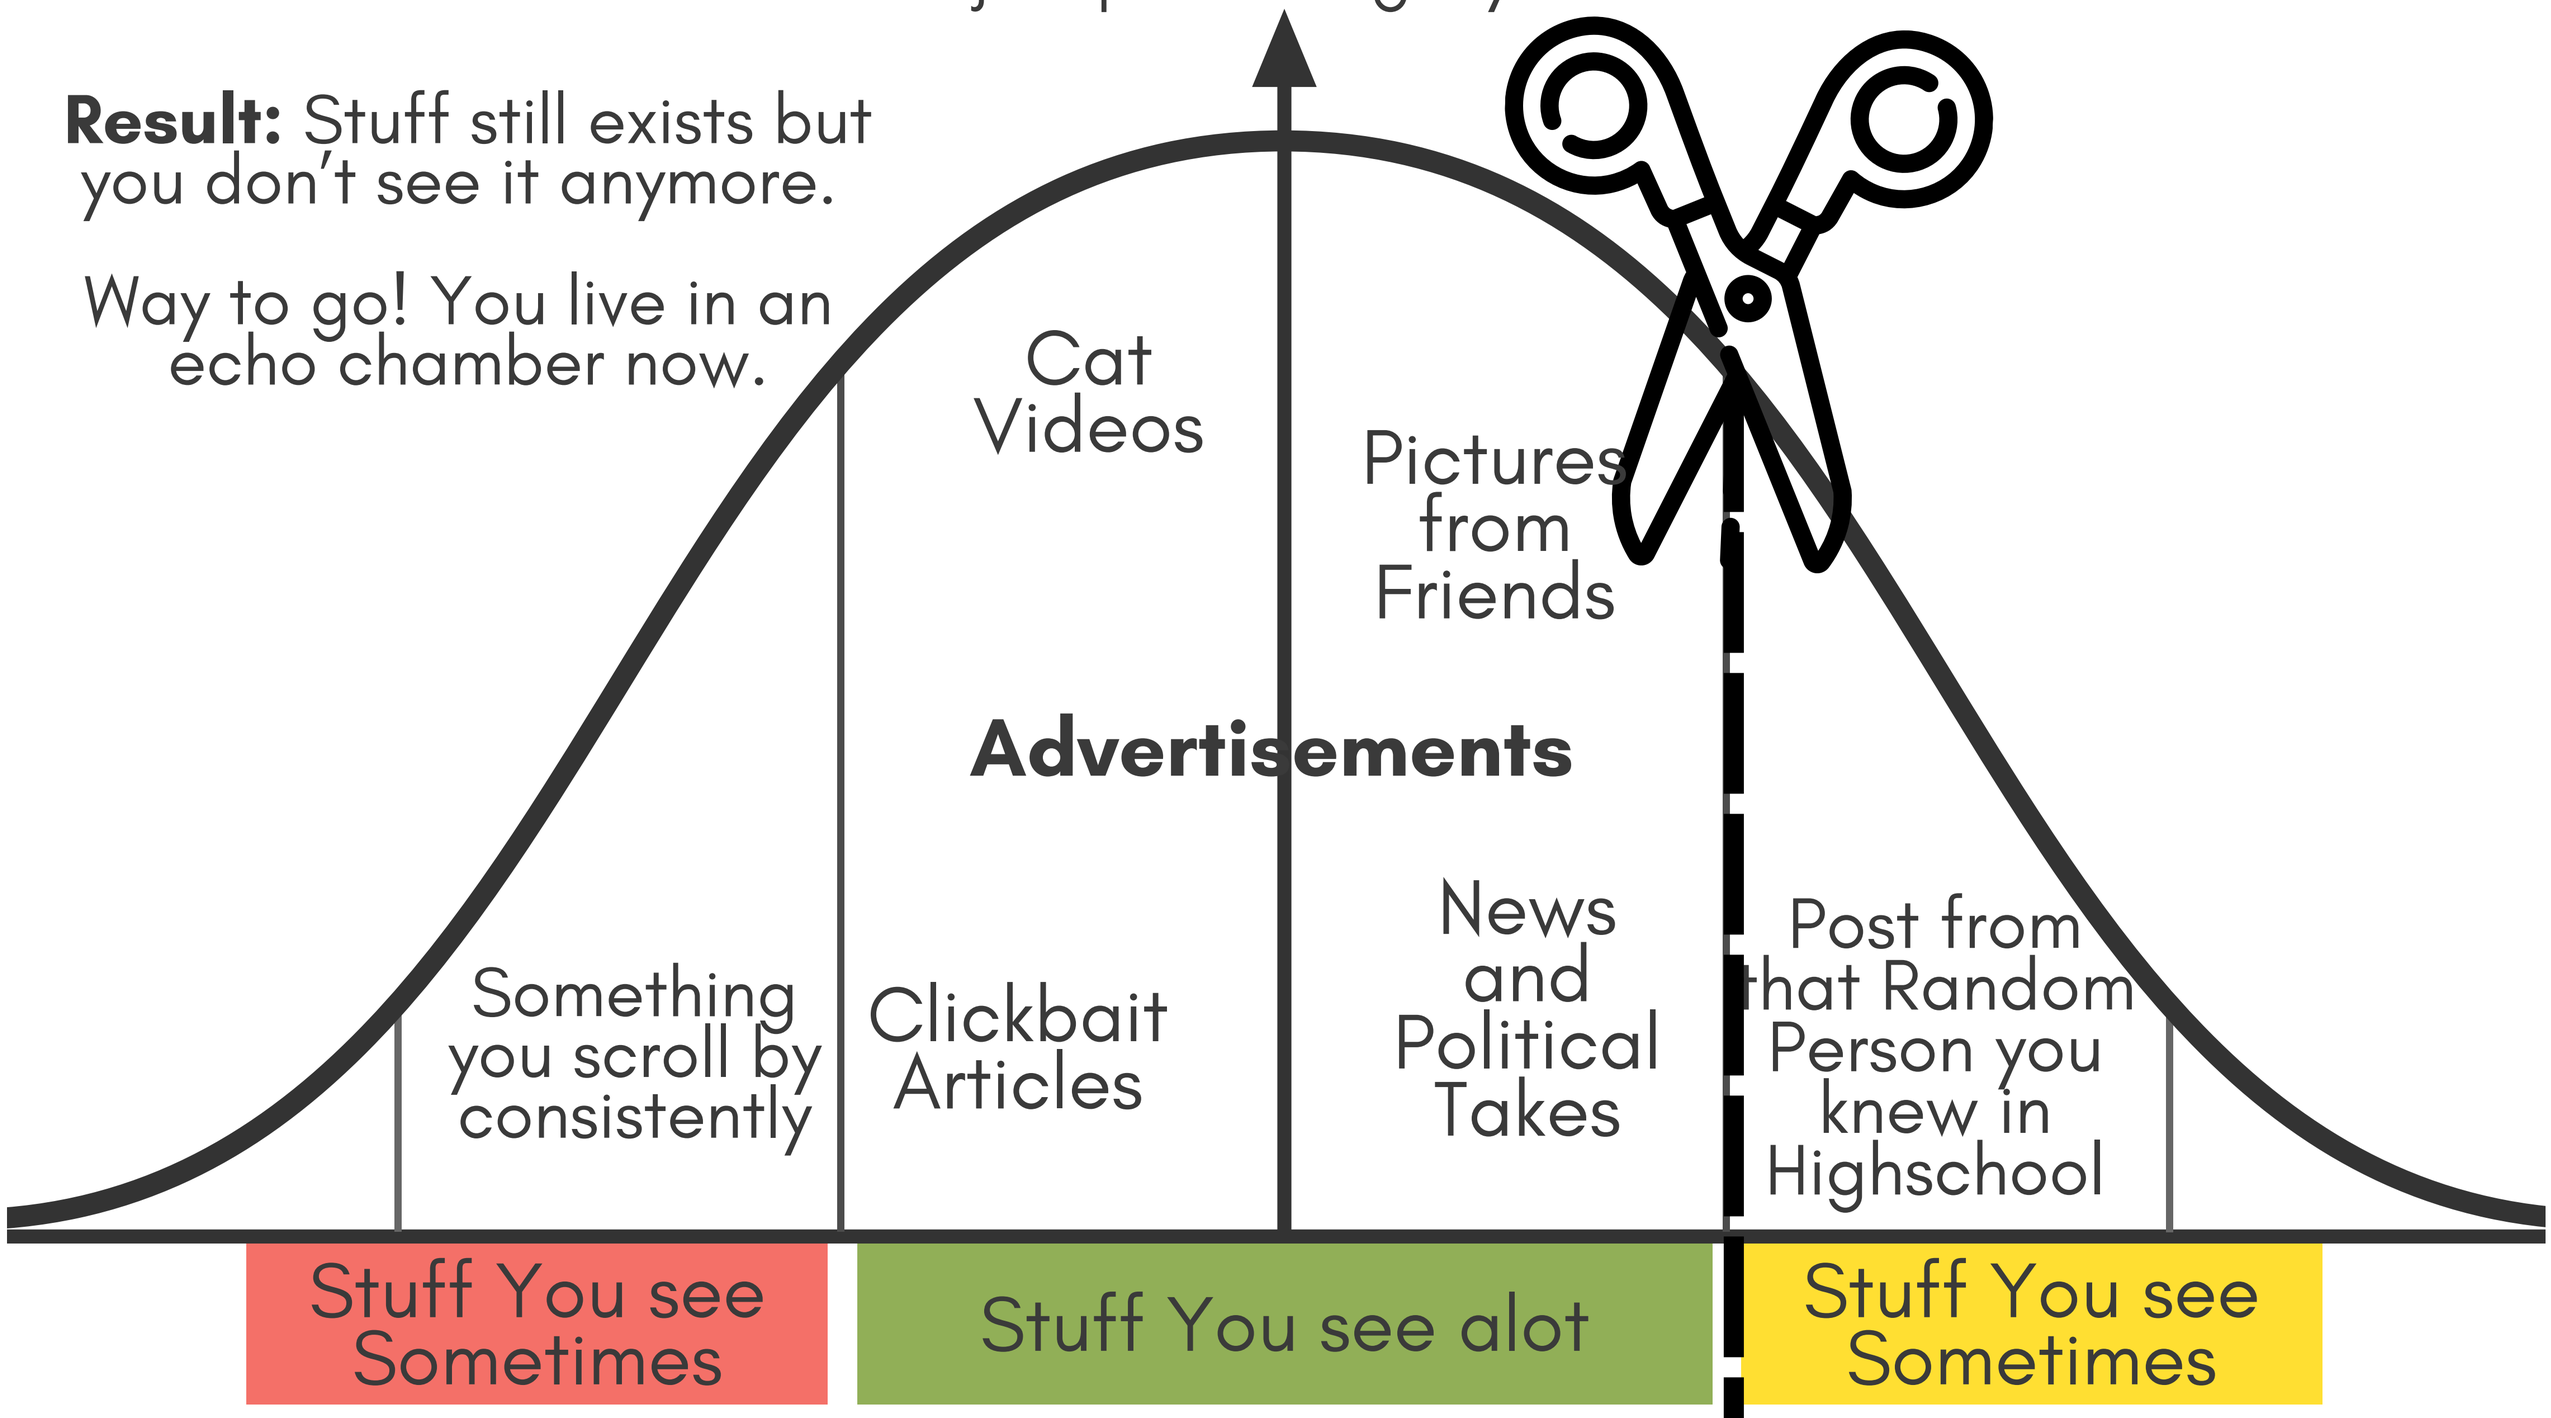
All the Stuff That Comes Up on Your Feed in a Day

Step 1. The Echo Chamber Squeeze

"If you don't like it, unfriend me!"
Or "I'm just protecting my Peace"

Result: Stuff still exists but you don't see it anymore.

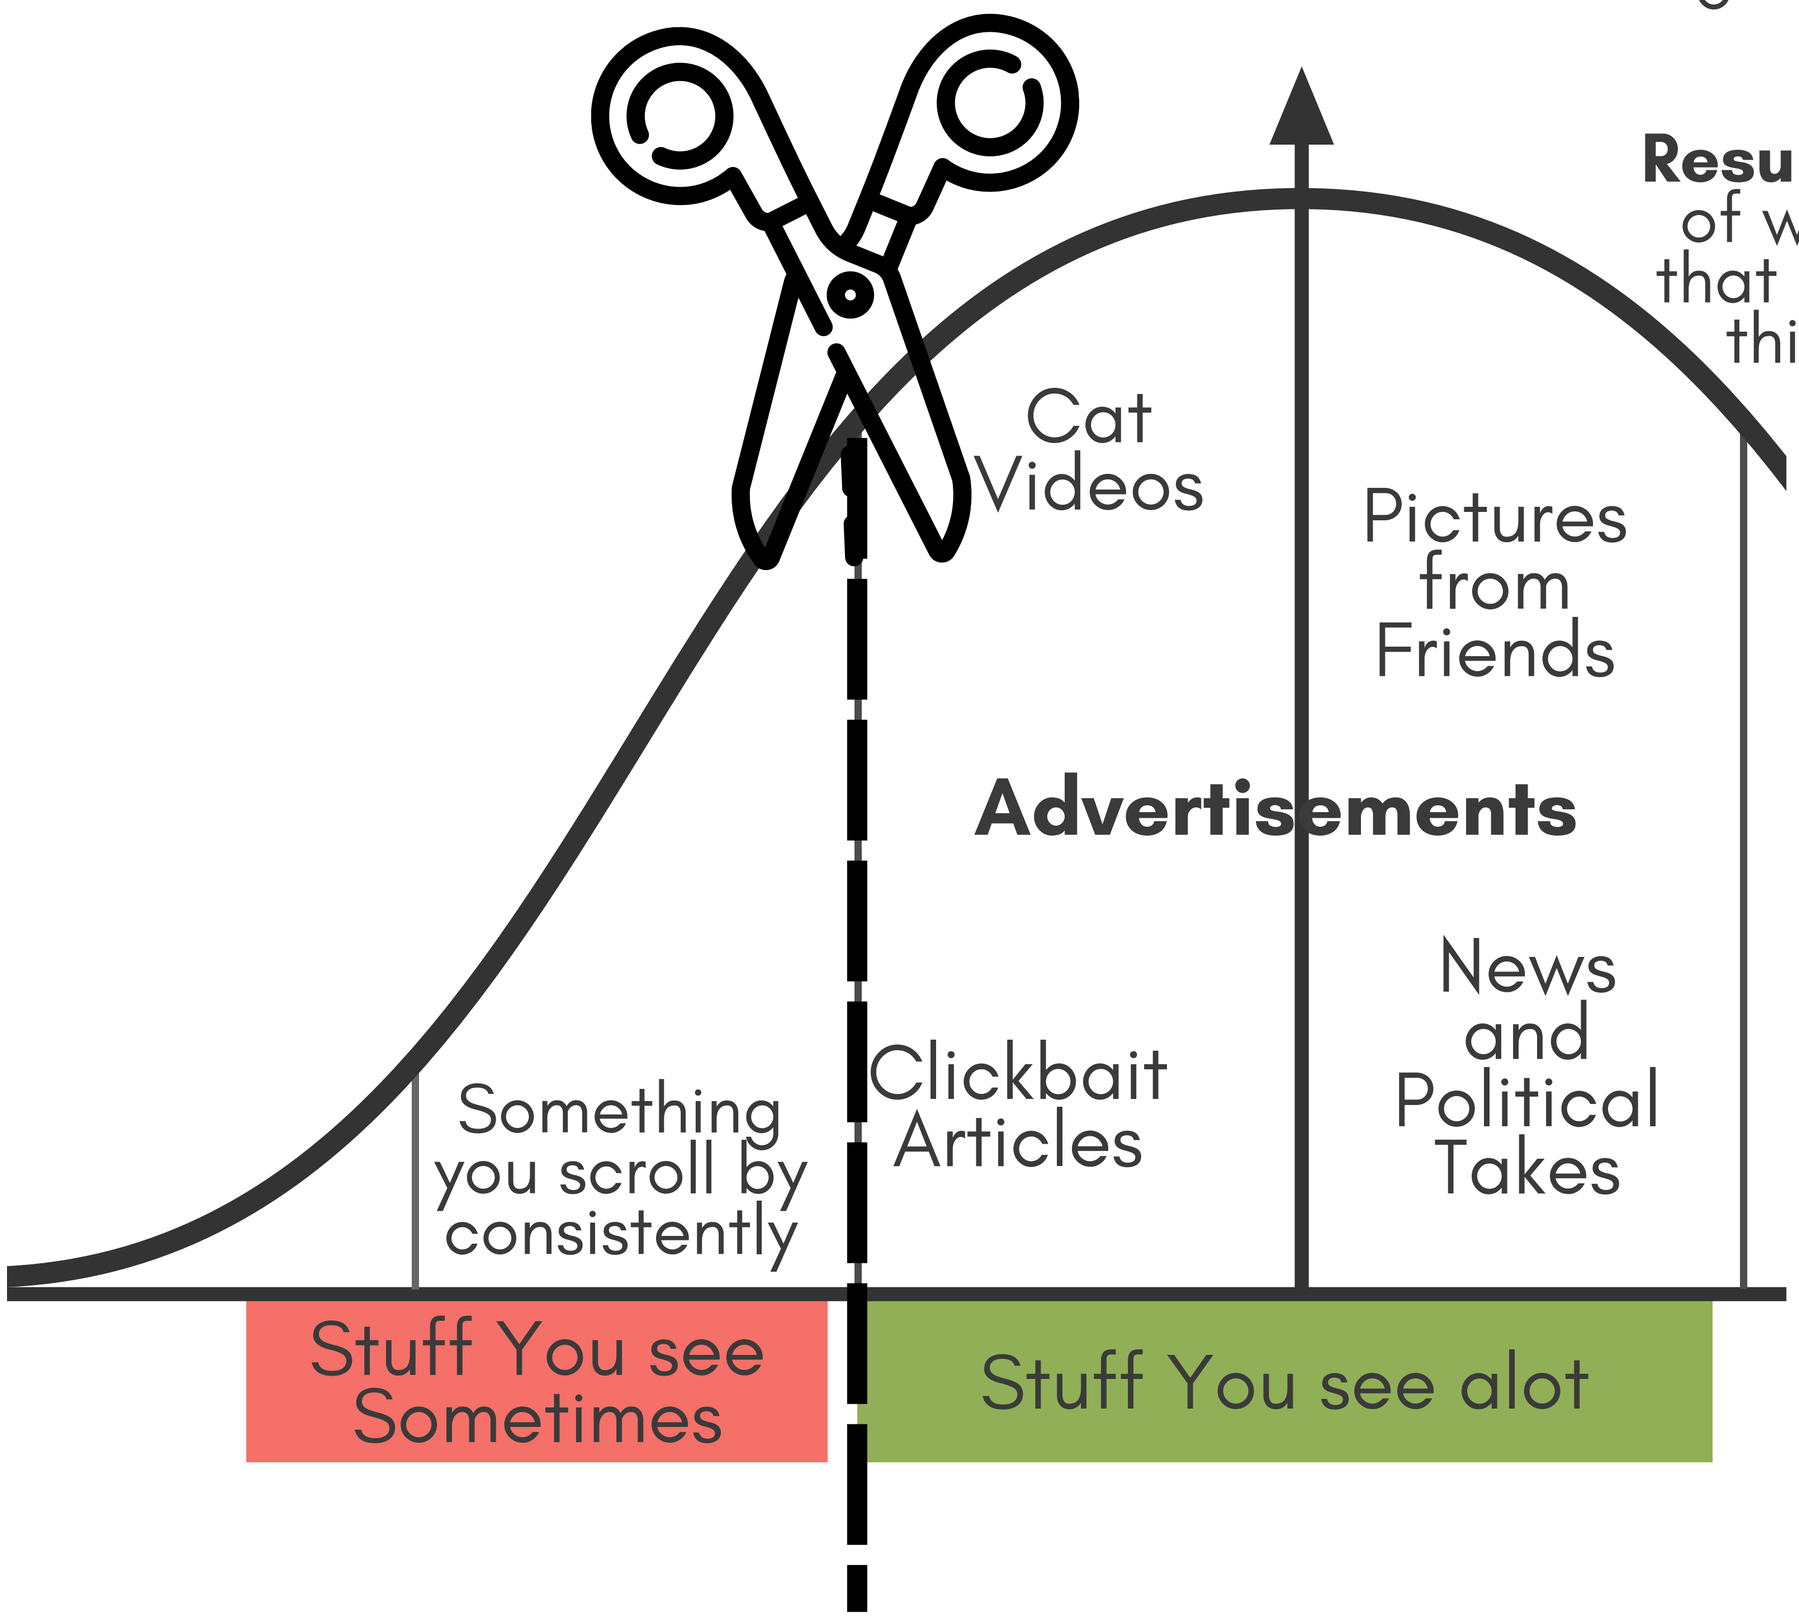
Way to go! You live in an echo chamber now.



Note: You can repeat this process as many times as you want and make your echo chamber smaller and smaller each time.

Step 2. Algorithmic Hoisting - No Effort Necessary!

You don't click or interact with something enough.



Result: You see less and less of whatever the thing is so that it can be replaced with things you will click on.

Step 3. Your New Echo Chamber - Nice and Cozy

Don't worry the process starts over!

Result: Your world narrows with no plan for anything else.

But hey, you won't run out of stuff to scroll!
